**2009**

**FREE Zinc Protection Cream with  
Dermal-Infusion Facial**

Age proof and sun proof your skin with this sizzling summer facial delivering immediate protection and correction from harmful UV. Ultrasound and micro current penetrate a superior blend of antioxidants and bio-peptides to protect and repair damaged skin cells. Cool down with a refreshing ice globe milk or honeysuckle mask to balance skin hydration and reveal a luminous complexion. Plus you take home a FREE Zinc Protection Cream, SPF 18 (1oz) for complete protection following your facial.

**Lift or Tuck without Surgery!**

SkinTyte® is used to deeply heat dermal collagen. Treatments cause contraction of collagen and force a renewed collagen foundation leading to increased firmness and fullness, as seen in the breasts to the right. The procedure is for patients who desire moderate, noticeable improvements without surgery. There is no down time and treatments are safe for all skin types. It can be performed on any area of the body where an improvement in skin firmness is desired. Popular areas include the face, neck, abdomen, and arms. Full results take up to 4 months following a series of treatments as the collagen foundation of your skin is rebuilt and strengthened.

Actual Client Photos after 3rd SkinTyte Treatment – patient will continue to see improvement for 4 months.
