Offer Available
this month only
on facials of
\$85.00 and up.

trioSKINCARE

Don't hide winter stressed skin. Hydrate and Protect It!

Winter can be tough on skin. Cold temperatures, low humidity and dry indoor heating combine to rob the skin of moisture, leaving it dry and flaky. Follow trio's winter skin care tips to restore a happy, healthy winter complexion. We have the right option for you.

*All skin types, oily or dry will benefit from a skin hydrator in the winter months. Look for products that contain D20 (Heavy Water or Deionized Water) and/or Hyaluronic Acid. If it's not one of the first ingredients listed, your not getting a good hydrator. Try Cosmedix Mystic, (\$36) and/or Reviva's Hyaluronic Acid Ampoules (\$99).

*A scrub or a washcloth may remove flaky skin for a temporary improvement. However, the scrubbing process strips the skin's lipids that are necessary for keeping the skin moist. Enzymes digest dead skin cells to prevent pore clogging without damaging the skins protective barrier. Try Cosmedix Pure Enzymes (\$36) or Pure's Pineapple Enzyme (\$17).

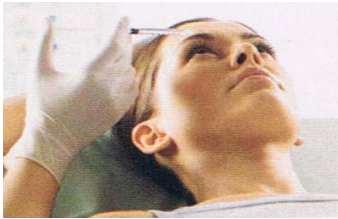

*Rejuvenate the skin with a therapeutic night cream containing retinol. Products containing retinol reduce facial lines, wrinkles, and age spots, regulate the skins pH and increase the skins ability to absorb and hold essential moisture. Try Cosmedix Refine or Define (\$65) or DNA Super Vitamin A Crème (\$40).

*Take internal supplements to directly increase skin hydration and fight free radical damage. Try Jarrows Flaxgels (\$17.00) and Pure Inventions Green Tea Supplements (\$27-\$35).

*Ask us about trio's DNA Rescue-H Treatment \$100.00 and Cosmedix Rescue a mask, moisturizer and eye cream All-in-one (\$45).

*And finally, **Don't forget the sunscreen.** The skin takes a fierce beating during winter months and needs all the protection it can get. Your skin is vulnerable to the harmful and cumulative effects of UV exposure all year long. Look for formulas that combine moisturizer with UV protection. Try Cosmedix Protect (\$45) or Jan Marini Antioxidant Face Protectant (\$45).

Should you try a new shot of Happiness?

QUICK, TURN THAT FROWN UPSIDE-DOWN! A recent study in *Dermatologic Surgery* found that 9 out of 10 patients suffering from depression who received

Botox injections in their frown lines (between the brows) showed less clinical depression after 2 months of treatment. Researchers say the study backs up the theory that frowning can make you feel worse, while simply smiling can make you feel better. Don't ditch your therapist just yet, but do laugh loud and often. Treatments average \$200.00 and last up to 4 months.

See if Botox is right for you.

Schedule with Dr. Karimi **February 10th or 13th** and receive 10% Off your first Botox Treatment

Discount is available to new Patients Only. Minimum of 30 units.

PRODUCT OF THE MONTH

Winter skin is parched and thirsty

Give Your Skin a Drink!

**100%
Hyaluronic Acid
Ampoules**

By Reviva

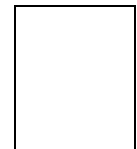

As we age the body produces less hyaluronic acid which has an adverse effect on the normal softness and smoothness of the skin. Combined with cold temperatures, low humidity and dry indoor heating hyaluronic acid levels dramatically decline, quickly accelerating a parched and aged skin appearance. Due to undeniable clinical results and client requests, this once Professional Only product, is now available for Retail Purchase. 10 per box.
