**LED<sup>T</sup> Gets a POWERFUL Boost**

**New THRUST panel delivers 2x the Light Emitting Diodes & Blue Light Therapy**

**HISTORY OF LED.** In 1903, a Nobel Prize of Medicine was given to a scientist named Niels Finzen for use of photo therapy. Research progressed and by the 1960s photo therapy - now referred to as L.E.D Therapy (or LEDT) was used in most of Europe for treatment of medical conditions including chronic pain, arthritis & rehabilitation. During the 1980s through today the field has expanded exponentially. Lightwave Technologies, a light device manufacturer, has emerged as the leader of this cutting edge technology in tissue healing & rejuvenation.

**2011 UPGRADES.** The *NEW thrust panel* has exceeded our expectations and clients can expect bigger and better results! In addition to red and infrared, trioSkincare **now offers advanced Blue Light Therapy.** Used to treat psoriasis, stimulate the immune system and kill bacteria, Blue Light Therapy adds yet another weapon to our arsenal of exceptional corrective skin treatments.

*Lightwave*

The only FDA approved manufacturer for Red, Infrared & Blue light technology.

**The Club you should be joining in 2011...**
