Be Sunscreen Savvy... *Is your family using sunscreens with harmful chemicals?*

Avoid products containing pore clogging petroleum and fat storing mineral oil. Mineral oil has been shown to contribute significantly to cellulite.

Avoid harmful chemical ingredients such as PABA, homosalate, benzophenone, parsol, octyldimethyl, octylmethoxycinnamate, 4-methylbenzylidene. Some of these have been shown to increase cancer cell growth in lab studies. Why? Chemicals make your skin react negatively to UV exposure.

Do you suffer from Rosacea, Eczema, Psoriasis or other Sensitive Skin Issues? Call today for information on 100% chemical & preservative free sunscreen options by Iredale Mineral Cosmetics and the DNA™ Health Institute, Cryogenic Division.
