# May is all about Mom

## MASSAGE OF THE MONTH

### *Surrender*

*...with head to toe pampering*

Pamper yourself or someone you love with this 90 minute head to toe retreat. Immediately relax while lavender aromatherapy calms the senses and an invigorating peppermint mask hydrates the hands and feet. Surrender to the relaxation of an aromatic swedish massage combined with a detoxifying back scrub and mineral rich mud mask. You're guaranteed to emerge revitalized and refreshed.

*Available this month for \$105.00*

Regularly \$175.00

trioSKINCARE

## TREATMENT OF THE MONTH

### *The Medi-C Polish*

*...an antioxidant cocktail to minimize pores*

Get your skin geared up for summer sun with a treatment designed to strengthen the skin's protective mechanisms from harmful UV. Antioxidants smooth and polish the skin while mango butter plumps and hydrates. Raspberry and strawberry acids provide anti-inflammatory benefits making this an exceptional treatment for sun damage, rosacea and acne. This month enjoy this skin polishing treatment with a complimentary shoulder & décolleté massage.

*Available this month for \$89.00.*

Regularly \$110.00

*Give Mom a Time out this Mother's Day with a trio gift card.*

## Can Synthetic Chemicals Really Make you FAT?

*Medical Evidence says YES.*

In her ground breaking book, *The Detox Diet - Eliminate Chemical Calories and Enhance Your Natural Slimming System*, Dr. Paula Baillie-Hamilton tackles what she believes is the root of weight gain. The Detox Diet links the current fat epidemic to the synthetic chemicals used in agriculture, skin care, cosmetics and household products. She identifies insecticides & herbicides called Carbamates. These chemicals are used in the growing of food, cosmetic and medicinal ingredients and are also used to fatten livestock because of their ability to slow down the metabolic rate. Carbamates are even used in medicine to promote weight gain in humans. It is known that toxic chemicals, even when present in small amounts, directly damage muscles and disrupt hormones controlling growth. Slimming hormones called Catecholamines are known to come under attack by these chemicals, directly interfering with the metabolic process and inhibiting our bodies own natural slimming system. Synthetic chemicals are highly fat-soluble and when we are exposed to them the body creates fat to safely store those toxins it cannot process and eliminate safely. Dr. Hamilton's research suggests that the highest levels of "slimming nutrients" are found in organically grown produce. Information from Organic and Natural Living, by MiEssence, Issue 2.
